

Task 5.2C – Answers

Question #1:

<https://youtu.be/JErWhF63gFI>

Question #2:

<https://github.com/Goolog/SIT210-Task5.2C-RPiGUI>

Question #3:

A real life usage of this scenario would be to control the traffic flow of cars in particular directions. One could perhaps use traffic light colours to control how quickly and whether or not cars should be moving in a particular direction. This would be useful for maintaining the safety of workers on a building site who need to carry out their job on the side of a busy road.
